REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose, in combination with all the limitations, a method of controlling a switched reluctance generator operating in different modes by controlling the excitation of turn-on and turn-off angles and taking into account an input speed of the generator and power requirement from a power system, in which the method calculates an optimal efficient turn off angle for the switched reluctance generator as a result of an curve fit function and taking into account the performance parameters of the generator and thereafter determining an optimal efficiency turn-on angle for the generator based on supplying power to meet a power requirement and a previously calculated optimal turn-off angle.

Moreover, the remarks in combination with the amendment filed on 12/01/05 are convincing. The prior art fails to disclose choosing a turn-off angle first based on analytical functions taking into account the power requirement and parameter of the switched reluctance generator and thereafter selecting a turn-on angle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
